Projects

GitHub Issue Resolver | *Python, scikit-learn, Streamlit, pytest, GitHub REST API* Code
- Built an agent that reads a GitHub issue and proposes a fix using TF-IDF code retrieval
- Used Python AST inspection for bug patterns and deterministic patch generation
- Validated patches with pytest and required human approval before modifying files
- Shipped a Streamlit interface using classical NLP with no LLM dependency

Sales Analytics | *Python, pandas, Streamlit, Plotly, Jupyter* Code
- Cleaned and explored the Superstore retail dataset using pandas in a Jupyter notebook
- Built an interactive Streamlit dashboard with Plotly charts, region and category filters
- Added KPI metrics and CSV export of filtered data for business reporting

Digital Doppelganger | *React, FastAPI, Python, Tailwind CSS* Code
- Detects possible online impersonation by scoring username, name, bio and keywords
- Returns a 0-100 risk score with plain-language reasons using explainable similarity metrics
- Built side-by-side profile comparison in a React and FastAPI app with Tailwind CSS
